Miles of Smiles, Ltd.

Vol. 2, Issue 2

## Miles of Smiles wants to help you bring quality dental care to your students.

All school based dental programs are not the same. We value our partnership and long history with the IDPH Dental Sealant Grant program in counties that participate. This provides quality assurance and keeps additional funding within the community.

We treat ALL children who present a completed positive consent form at no charge to the family or school.

Our dental team will come to your school to offer exams, cleanings, fluoride and sealants. We also have a network of dentists who will do the follow-up care needed and, in some counties, we now offer restorative care at the schools.

We value and encourage those with a dental home to seek their oral healthcare there.

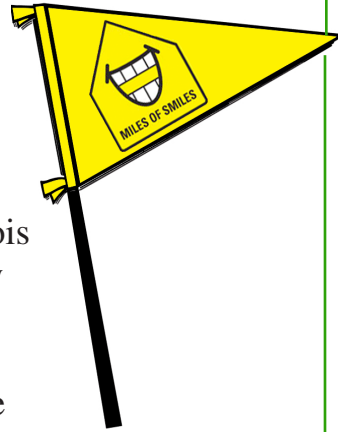

**Send Miles of Smiles forms home with your students today!**

## WELCOME TO THE TEAM

Miles of Smiles welcomes our newest team member, Dr. JR Keller of Edwardsville. Dr. Keller will be providing restorative dental services in central and southern Illinois schools. Meet the rest of the dental team by visiting our website, [milesofsmiles.com](http://milesofsmiles.com), and click on "About Us." While on our site, you can also download forms and read more about our program.

## Miles of Smiles Check-up:

- ✓ We continue our collaboration with the Sangamon Co. Health Department to provide oral health education in the schools and we work closely with the Central Counties Health Centers to make sure the children receive the follow-up care they need.
- ✓ We are collaborating with the Will County Community Health Center to improve access to oral healthcare for all school children.
- ✓ We have Dr. Tim Jacob in Southern Illinois, who also works for Shawnee Health Services — a public health dental clinic in Marion that provides care to low income and Medicaid patients. Shawnee will take our children who need follow up care. This allows optimal dental care to families needing a dental home.
- ✓ We were a proud participant at the Illinois State Fair, providing dental exams at the IDPH Wellness on Wheels van. We also were able to provide dental care at several Back to School Fairs around the state.

## We are local to your community!

Our restorative program will be catered to the community's needs and requests. We value this partnership for the best oral health outcome for all children and their families. As a statewide company, our business office is located in the center of the state. However, our dental team — our dentists, hygienists, assistants — are local to the community they serve.

We are happy to be partnering with the St. Louis District Dairy Council, "The Nutrition Education People," to get the proper nutrition information to children and their families.
